

**Disasters can strike without warning.** Are you armed and empowered with the tools you need to respond to a medical emergency in your home or office? **The LSDS Trauma Medical Kit** is a custom-built emergency medical kit, specifically developed to allow you to provide expedient first aid in the event that medical care is interrupted or delayed.

# TRAUMA MEDICAL KIT

## HOW IT WORKS

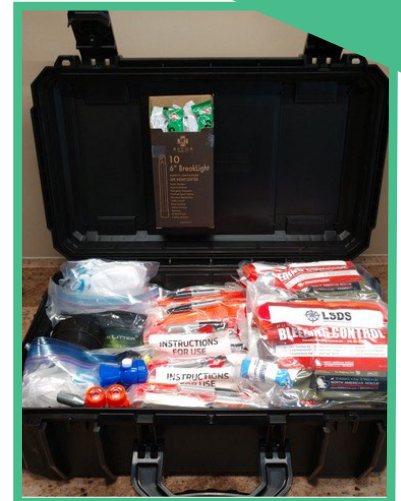

**STEP 1 Intake Call with LSDS**  
The personalization process begins with an in-depth intake call with one of our specialists to determine your specific LSDS Trauma Medical Kit requirements - individual medical concerns, geographic location, environmental factors, and any other impacting factors.

**STEP 2 Customized 24 Hour Egress Kit Build**

- ▶ One of our subject matter experts reviews your intake information and digitally builds a customized kit for you based on your specific requirements.
- ▶ Building a Trauma Medical Kit is a team effort, so we'll provide updates and request your input throughout the process. If an item isn't exactly what you want or need, we'll exchange it until it is perfect.
- ▶ Once the kit construction is complete, we'll submit it to you with an invoice for final approval prior to procuring the items. Upon approval, our team will get to work procuring items and prepping them for use.

**STEP 3 Delivery & Kit Introduction**

- ▶ Once all items have been received, your Trauma Medical Kit will be professionally packed and shipped directly to your door.
- ▶ Each kit is 100% ready to use immediately upon delivery, with no assembly required.
- ▶ Once your kit has arrived, one of our subject matter experts will schedule a call with you to review the contents of your kit and best practices for use.
